📄 PROFESSIONAL SUMMARY

Product/UI Designer with 4+ years of experience delivering user centered digital products across SaaS, eCommerce, healthcare, and mobile first platforms. Experienced in Figma, interaction design, rapid prototyping, service design techniques, user research, and translating ambiguous user needs into intuitive, accessible experiences. Skilled at collaborating with developers, product teams, clients, and stakeholders to define design approaches, facilitate workshops, and deliver production ready solutions. MSc in International Business Management (Distinction), combining strategic thinking with a human centered approach to creating scalable digital experiences.

📁 PROFESSIONAL EXPERIENCE

08/2023 – 02/2026

Remote, London-based

Kyros Tecsol Private Limited

UX/UI Designer

- Led user centered design for AI powered SaaS web and mobile products, translating business objectives and user needs into user journeys, wireframes, prototypes and interface solutions.
- Created interactive prototypes and high fidelity designs in Figma to validate concepts, communicate interaction behavior and support development through production.
- Developed and maintained a Figma based design system using reusable components, variants, Auto Layout and design tokens, improving interface consistency by **35%**.
- Conducted user research, usability testing and workflow analysis to identify pain points and redesign key journeys, increasing user activation and task completion rates by **20%**.
- Planned and contributed to design workshops with product teams and stakeholders, helping teams explore solutions and align on evidence based design decisions.
- Produced design documentation covering interaction states, accessibility considerations, edge cases and developer specifications, reducing implementation ambiguity across Agile projects.

10/2022 – 07/2023

Chennai, India

Deepsense Digital Solutions

Senior UX/UI Designer

- Designed digital experiences across eCommerce, healthcare and consumer platforms, translating user requirements into information architecture, user flows, prototypes and production ready interfaces.
- Conducted user research, usability testing and iterative design improvements, reducing design to development iterations by **25%** while improving usability, customer satisfaction and product quality.
- Created high fidelity Figma prototypes to communicate product behavior and interaction patterns, contributing to project delivery and client engagements exceeding monthly targets.
- Optimized onboarding, checkout and self service experiences through continuous testing and evidence based design decisions, improving conversion rates and reducing user drop off across key workflows.

- Collaborated with engineers, product managers and stakeholders to refine requirements, resolve implementation challenges and maintain quality from concept through delivery.

05/2022 – 10/2022
Chennai, India

Deepsense Digital Solutions

Interaction Designer Intern

- Created responsive interfaces, prototypes and interaction patterns using Figma, ProtoPie and Framer, helping teams validate concepts before development.
- Conducted usability evaluations, heuristic reviews and user research analysis to identify experience gaps and recommend improvements for accessibility and usability.
- Collaborated with designers and developers to maintain reusable UI components, prepare design assets and support accurate implementation within Agile product teams.

EDUCATION

2023 – 2025
London, UK

MSc International Business Management (Project Management)

London Metropolitan University, UK

- Distinction

2018 – 2021
Chennai, India

BSc Visual Communication

Loyola College, Chennai, India
